

## **Conference Objectives**

- 1. Enhance scientific information and data exchange regarding current research on methyl bromide alternatives.**
- 2. Provide a forum for interdisciplinary scientific exchange and cross agricultural information exchange.**
- 3. Develop and distribute conference proceedings as an information source on state-of-the-art methyl bromide alternatives for use by Researcher, Users of Methyl Bromide, Legislators, Government Policy Officials, and all other interested parties.**
- 4. Support the gathering of data on potential alternatives to methyl bromide for future evaluation and prioritization.**
- 5. Monitor the development of viable alternatives to methyl bromide.**
- 6. Evaluate technology transfer processes and incentive programs needed to implement alternatives.**
