

Conference Objectives

1. Enhance technology transfer processes and incentive programs needed to implement alternatives.
2. Enhance scientific information and data exchange regarding current research on methyl bromide alternatives.
3. Provide a forum for interdisciplinary scientific exchange and cross-agricultural information exchange.
4. Develop and distribute conference proceedings as an information source on state-of-the-art methyl bromide alternatives for use by Researcher, Users of Methyl Bromide, Legislators, Government Policy Officials, and all other interested parties.
5. Support the gathering of data on potential alternatives to methyl bromide for future evaluation and prioritization.
6. Monitor the development of viable alternatives to methyl bromide.
