

## PROPYLENE OXIDE THE ALL PURPOSE FUMIGANT

Morris Warren\* ABERCO Inc

Propylene oxide, a registered fumigant used to treat food commodities, continues to demonstrate its wide versatility in both preplant and postplant applications. This talk will summarize the latest results of ongoing preplant tests in the USA and Spain for tomatoes, strawberries, peppers, eggplant, squash , ornamentals and turf. At this writing most of the tests are still underway, but the results clearly show that propylene oxide is a viable methyl bromide replacement.
