

Commercial Scale Q/PS Methyl Bromide Emissions Control

Gualdalupe Cooling, Inc. of Nipomo, CA has been operating a permitted commercial scale methyl bromide emissions control system since April 2013 to support its fumigation system used for the export of broccoli to Taiwan. The system employs Value Recovery's patented technology that chemically destroys methyl bromide using a thiosulfate solution described at previous MBAO meetings. Presented will be an overview of design considerations, operations data summary, source test and technical and installation challenges that were overcome.
